

Dear Valued Patient,

Following Oregon State health guidelines, Fusion Dental Specialists are open.

Your health and well-being are our top priority. Enhanced precautions have been implemented to ensure the safety of our patients and team members. This means we adhere to best-in-class safety practices based on guidelines from the Centers for Disease Control and Prevention (CDC), American Dental Association (ADA) and state/local mandates.

As always, we're following best practices for sterilization protocols of dental instruments and operatory equipment. We're also screening every patient when scheduling, when confirming and again upon arrival, using the CDC's guidelines for identifying any symptoms of illness or recent exposure to COVID-19.

As an added precaution, anyone entering our office will have their temperature taken to confirm it is less than 100.4 degrees. To ensure adequate social distancing and safety, we are only allowing patients and necessary caregivers into the office.

To further reduce risk, we've arranged our reception areas for social distancing and all common area surfaces are disinfected every hour. In addition, patients are required to wear a face-covering while in the office, except while receiving dental care.

During treatment, our dentists, hygienists and assistants will all be wearing masks and additional personal protective equipment (PPE). They will also sterilize each patient's mouth with an antiviral/antibacterial rinse before starting treatment.

All of these measures are designed to ensure the highest level of safety and a great patient experience.
